

DEVANSH KUMAR

Data Analyst | SQL | Python | Power BI | Excel

+919058949408 kumar.devansh9058@gmail.com LinkedIn GitHub Saharanpur, India

PROFESSIONAL SUMMARY

Computer Science graduate with Data Analyst internship experience in Python, SQL, Power BI, and Excel. Analyzed 10,000+ records and developed 5+ interactive Power BI dashboards, reducing reporting time by 30%. Skilled in data cleaning, data transformation, exploratory data analysis (EDA), SQL analysis, data visualization, KPI analysis, and business intelligence.

SKILLS

Programming Languages :	Python, SQL, C
Databases :	SQL, MySQL
Business intelligence :	Power Bi, Power query, Dax, KPI analysis, Dashboard Development, Data visualization, Business Intelligence, Joins
Excel :	Pivot tables, VLOOKUP, XLOOKUP, INDEX-MATCH, Data cleaning, Data transformation, Dashboard making
Python Libraries & ML :	Numpy, Pandas, Matplotlib, Seaborn, plotly, Scikit-learn, Flask, OpenCv
Tools & Platforms :	Git, VS Code, Pycharm, Jupyter notebook, Microsoft Office, GitHub, Google Docs, Google Sheets
Soft Skills :	Communication, Teamwork, Problem Solving, Critical Thinking, Adaptability, Decision Making
AI Tools :	Prompt Engineering, Gemini, Copilot, ChatGPT

WORK EXPERIENCES

Data analyst intern Internship <i>Alto sinewave technology pvt. ltd.</i> - Analyzed and cleaned 10,000+ records using Python, Pandas, SQL, and Excel to identify trends and improve data quality. - Built 5+ interactive Power BI dashboards to track business KPIs, trends, and operational performance. - Performed data transformation, EDA, and KPI analysis to generate actionable business insights. - Automated reporting workflows and reduced reporting time by 30%, improving efficiency and supporting data-driven decision-making. <i>Technologies / Skills Used : Python, SQL, Power BI, Power query, Excel</i>	Feb 2026 - Jul 2026 <i>On-site • Delhi</i>
Data Science Intern Internship <i>Codec Technologies</i> - Processed and analyzed 10,000+ records using Python, Pandas, and SQL for exploratory data analysis. - Performed data cleaning, preprocessing, feature engineering, and EDA to identify patterns and trends. - Developed and evaluated 3+ machine learning models for predictive analysis. - Created data visualizations using Matplotlib to communicate analytical findings and model results. <i>Technologies / Skills Used : Python, SQL, Pandas, Numpy, Scikit-learn</i>	Mar 2026 - Jul 2026 <i>Remote • Virtual</i>
Python Developer Intern Internship <i>Cloud Infotech</i> - Developed a Python-based PII detection and redaction application to identify and remove sensitive personal information from documents. - Worked with SQL, Git, and SDLC practices while supporting data-processing and analytics-related tasks. - Implemented document processing functionality for 6 document types. <i>Technologies / Skills Used : Python, SDLC, Git</i>	Jul 2025 - Sep 2025 <i>Remote • Virtual</i>

PROJECTS

Cricket Data Analysis (T20) GitHub - Analyzed T20 cricket datasets using Python, Pandas, and NumPy to identify team and player performance trends. - Performed data analysis and visualization to identify key factors influencing team wins and player performance. - Created visual reports and interactive analysis using Streamlit and Matplotlib. <i>Technologies / Tools Used : MS Office, Matplotlib, Python, Numpy, Pandas, Streamlit</i>	
Heart Disease Prediction System GitHub - Developed a Streamlit-based ML web app to predict heart disease risk using patient data. - Trained and optimized models including Logistic Regression, Random Forest, and KNN achieving 90% accuracy. - Integrated a joblib model for real-time predictions alongside a user-friendly web interface. - Analyzed health data using Pandas and NumPy to identify key risk factors. <i>Technologies / Tools Used : Streamlit, Pandas, NumPy, Python, Matplotlib, Seaborn</i>	
Sales Teams Quarterly Performance Analysis GitHub - Built an interactive Power BI dashboard analyzing 8,800+ sales opportunities across 30 sales representatives, 85 accounts, 7 products, and 3 regions. - Performed data cleaning, transformation, and data modeling using Power Query to integrate sales pipeline, product, account, and sales team datasets. - Developed DAX measures and calculated KPIs for win rate, won revenue, deal volume, pipeline stages, and sales performance. - Conducted sales performance analysis and identified key trends, including a 51.1% win rate in the East region and \$3.51M+ revenue generated by GTXPro. - Created interactive dashboards using slicers, filters, drill-throughs, and dynamic visualizations to support sales performance monitoring and business decision-making. <i>Technologies / Tools Used : Power BI, DAX, Power Query</i>	

RESEARCH & PUBLICATIONS

Artificial Intelligence in Healthcare <i>RAiSE 2025 – 4th International Conference on Recent Advances in Sustainable Environment Book of Abstracts Paper ID: 70</i> - Analyzed AI applications in healthcare across clinical, administrative, and financial domains, with a focus on AI-driven medical testing, automation, risk identification, and responsible AI adoption. - Examined challenges including algorithmic bias, data privacy, accountability, and AI explainability.	
--	--

EDUCATIONS

Shobhit University Gangoh <i>B.Tech in Computer Science</i>	Jul 2022 - Jul 2026 <i>CGPA : 7.9/10</i>
---	---

CERTIFICATIONS

- Data Analytics Job Simulation — Deloitte
- Data Science Job Simulation — BCG X
- Python Programming — Infosys Springboard
- Python — GUVI

AWARDS & ACHIEVEMENTS

- Participation and Lead:** Techno Zoom Hackathon 2025 - Inter-University Hackathon & Ethical Hacking
- Coordinator:** College Technical Festival Tech-Fest 2025 (Lead)
- Led the organization of Parichay Beats 3, the college's biggest cultural fest featuring a live performance by Ajay Hooda.
